

For Immediate Release:

Michigan, Trenton-Detroit

Trenton Forging Company Receives 2008 FIA Safety Award

Each year at its annual meeting of members, the Forging Industry Association honors member companies who have achieved success in their safety programs during the previous year. Trenton Forging Company proudly accepted a Safety & Health Award for the 2008 year.

The safety award winners were determined by the FIA Safety & Health Committee based on incident and severity rates as reported on logs required by the Occupational Safety and Health Administration (OSHA). The committee evaluates OSHA recordable incidents, including total deaths, total lost-workday cases, total incidents involving days away from work, total number of days away from work, total days of restricted work activity, total injuries and illnesses without lost workdays, total employee hours worked, and annual number of employees.

Human Resources Manager, Renee Moxlow, said, “Trenton Forging Company was very pleased to hear we had won the FIA Safety & Health Award. The safety of our employees is our highest priority and our Safety Team has undeniably been the catalyst leading us to this achievement. Their weekly meetings and constant communication with our Maintenance Department has decreased our injury rate substantially, leading to higher morale, a safer environment, and lower costs to the company. The Safety Program along with our Health Promotion Program is making Trenton Forging Company not only a safer place, but a healthier place to work. Both programs reduce our costs, and when we can do that we can put the

money in our employees' pockets instead of the insurance companies' pockets. It is very important to TFC that our team is healthy and safe, and we are very proud.”

Michigan-based Trenton Forging is a leading producer of custom impression die forgings for a wide variety of industries, including automotive, mining, military, and agriculture. Trenton Forging has the distinction of being one of the first companies of any kind worldwide to be certified QS9000, and the first closed impression die forging company in the world certified QS9000/ISO9002.
