

**For Immediate Release:**

Michigan, Trenton-Detroit

## **Trenton Forging Company Awards Chris Opfermann Employee of the Month of December**

Chris Opfermann, a twenty-four year old from La Salle, Michigan, was named Trenton Forging Company's Employee of the Month of December. Chris has worked as a mechanic for the Autosport Development racing team and as a CNC operator for Trenton Forging. He's been at the plant for four years.

Chris likes his job because "it is something different every day. No two days are alike."

Trenton Forging's President, David Moxlow, says, "Chris made the transition from the race-shop to the die shop nicely. As a race mechanic and fabricator, he understands the need for precision and that helped in his training as a CNC Operator. Chris quickly picked up the machine controls and has become an important asset in our die making process. He has started training in 3D modeling and will transition into the engineering department to become a forge die designer."

Operations Manager, Chris Trapp, says, "Chris was hired right from college into our race program. He is probably one of the most versatile employees we have here, as he is able to fit into any department. He is very conscious of the quality of work needed here. Chris is an employee that you never have to instruct more than once and from there he will deliver a quality product."

Michigan-based Trenton Forging is a leading producer of custom impression die forgings for a wide variety of industries, including automotive, mining, military, and agriculture. Trenton Forging has the distinction of being one of the first companies of any kind worldwide to be certified QS9000, and the first closed impression die forging company in the world certified QS9000/ISO9002.
