

For Immediate Release:

Michigan, Trenton-Detroit

Trenton Forging Hires Health Promotion Specialist

Trenton Forging Corporation took yet another step towards a healthier and more productive workplace.

Ms. Chelsea Moxlow, Health Promotion Specialist has joined the Trenton Forging Team as the Director of Health & Wellness. Ms. Moxlow earned her Bachelor of Science degree in Health Promotion and Behavior from the University of Georgia.

“A Health Promotion Specialist designs custom programs and interventions for individuals, businesses, corporations and whole communities in order to change health behavior,” says Ms. Moxlow.

Health promotion programs when implemented properly have proven to increase productivity, and significantly lower health care costs. This is achieved by reducing sick time, injuries, lowering cholesterol levels, blood pressure, weight and other health concerns.

Ms. Moxlow has initiated the first stages of a specially designed program called TFC Health, by conducting a one on one Needs Assessment Survey of every employee at Trenton Forging. The survey results will be analyzed in detail and a comprehensive approach will emerge to help Trenton Forging employees reach their overall health goals. The Trenton Forging program has been designed with incentive based rewards for all employees.

Companies with an effective health promotion plan can expect to see significantly lower absenteeism, fewer disability claims and reduced health costs.

Michigan-based Trenton Forging is a leading producer of custom impression die forgings for a wide variety of industries, including automotive, mining, military, and agriculture. Trenton Forging has the distinction of being one of the first companies of any kind worldwide to be certified QS9000, and the first closed impression die forging company in the world certified QS9000/ISO9002.
