

**For Immediate Release:**

Michigan, Trenton-Detroit

## **Trenton Forging Company Awards Miguel Torres Employee of the Month of August**

Miguel Torres has been a press operator at Trenton Forging Company for five years. His job includes setting up and operating hydraulic coining presses, which squeeze the forging to a tighter tolerance. According to Miguel, he enjoys his job because he “likes everything about it.”

Trenton Forging Company’s President, David Moxlow, says, “Miguel is a remarkably essential part of the team here. About 60% of all the forgings that are produced in our plant go through the press room, and Miguel is the one who coins the product, which is oftentimes the last process the product will go through before final inspection.”

Plant Operations Manager, Chris Trapp, says, “Miguel is a rare employee. He never calls off work, he comes in on time, and he will work overtime for you whenever he is needed. His work ethic is incredible, and he is very conscience of the job he is doing. It is rare to not see him smiling and enjoying what he is doing. The importance of a person like this in a business where it’s not always the easiest or lightest of work and the days are long is significant. Miguel’s attitude is displayed by his smile to all the people around him, and it rubs off on his fellow employees. We are lucky to have Miguel here.”

Miguel is married to his wife Teresa, and together they have three kids: Johanna, sixteen years old; Jimmy, twelve years old; and Rodrigo, nine years old. Miguel enjoys playing soccer with his children, spending time with his family, and reading.

Michigan-based Trenton Forging is a leading producer of custom impression die forgings for a wide variety of industries, including automotive, mining, military, and agriculture. Trenton Forging has the distinction of being one of the first companies of any kind worldwide to be certified QS9000, and the first closed impression die forging company in the world certified QS9000/ISO9002.
