FOR IMMEDIATE RELEASE:

Trenton, Michigan (March 5, 2008) – Trenton Forging Company a leading independent producer of closed die forgings for a number of North American industries, announced today that it has received re-certification of its ISO/TS 16949-2002 quality systems. Trenton Forging has been a leader world wide in the forging industry promoting accountability within all systems in the production of all products including critical safety suspension components. In keeping with its tradition of being a world leader (Trenton was the first forging operation world wide to receive the QS9000 certification) Trenton passed the three day audit by independent auditor SGS with recommendation for recertification without any non-conformities.

David Moxlow, Chief Executive Office of Trenton Forging applauded all of his associates at Trenton Forging for their day to day work ethics in keeping with "our tradition of being among the elite in the production of quality forged products". Moxlow went on to say its been a very exciting period for Trenton Forging, that in the past few months we have added new processes in the production of hot forgings, part specific Micro Alloy Conveyor lines, reducer rolls, and automated bar feeders to our electric heat stations. Our CNC tool room was complemented in the past few weeks with two new vertical machining centers and a new CNC lathe. In the past year Trenton Forging has expanded its market penetration into automotive drive line components, suspension product and the hand tools industry, being awarded new business from each market.
